ALTUNPA.COM

At the centre of trade, there is trust.

ABOUT ALTUNPA

Altunpa Global A.Ş. is a food production, supply and international trade company headquartered in Türkiye, operating internationally through its offices in Sudan and China.

Our global production network, our partnerships and our local presence across different markets let us offer customers reliable, competitive and sustainable solutions. From production and quality control through to packing, logistics and delivery, every operation is run to a professional standard.

Combining market experience across several geographies with strong sourcing capability, we build long-term value for customers around the world.

GLOBAL SUPPLY

Sourced at origin, delivered worldwide.

Altunpa buys at origin in Türkiye and Sudan, controls quality before loading, and ships to buyers across four continents. Contract, inspection, packing, customs and freight are handled by one team — the buyer deals with one counterparty from enquiry to delivery.

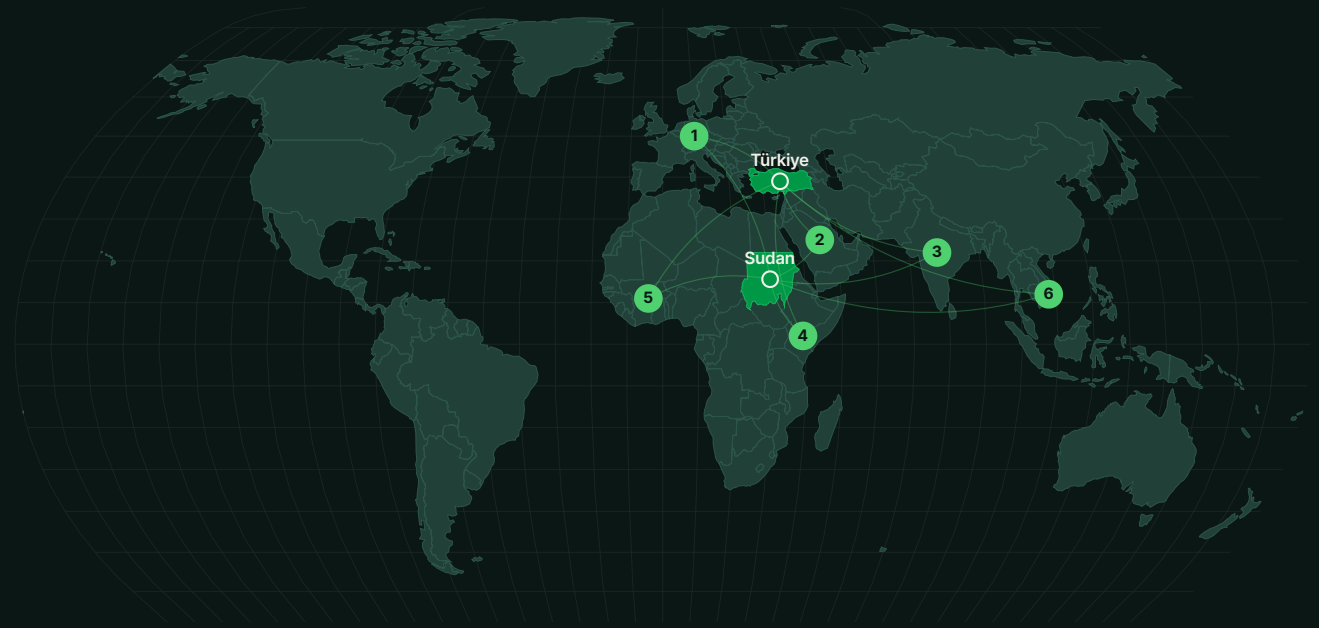

SOURCING ORIGINS

● Türkiye

Pulses, oilseeds and edible oils. Cleaning, calibration and colour sorting at contracted facilities.

● Sudan

Gum arabic, sesame, pigeon peas and hibiscus, bought through established relationships at source.

WHAT WE DO

- Source and contract at origin
- Inspect and analyse before loading
- Pack to buyer specification
- Handle customs, documents and freight

EDIBLE OIL

Sunflower Oil

Sunflower is one of Türkiye's principal oilseed crops, shipped both as crude and as refined oil. Refined sunflower oil is preferred in industrial kitchens and food manufacturing for its high smoke point and neutral taste.

Origin	Türkiye
Type	Crude and refined
Packing	Bulk (flexitank), 1–5 L PET, 18 L tin
Container	20' flexitank ≈ 22,000 L
HS code	1512.11 / 1512.19

APPLICATIONS

- Industrial food manufacturing
- Catering and food service
- Retail packed sale

RED AND GREEN

Lentils

Shipped in two main types, red and green. Red lentils are dehulled and split; green lentils are processed whole. Both pass through cleaning, calibration and colour sorting.

Origin	Türkiye
Type	Red (split), green (whole)
Calibration	2.5 – 4.5 mm
Packing	25 / 50 kg sacks, big bag
Container	20' DC ≈ 25 tonnes
HS code	0713.40

APPLICATIONS

Soup and ready-meal production

Catering

Retail packing

OILSEED

Sesame Seeds

06

Sesame is shipped both natural and hulled. It is the primary input for tahini and halva production, and is widely used in bakery as a surface topping.

Origin	Sudan, Türkiye
Type	Natural, hulled
Purity	99% – 99.95%
Packing	25 / 50 kg sacks, big bag
Container	20' DC ≈ 25 tonnes
HS code	1207.40

APPLICATIONS

Tahini and halva production

Bakery and baked goods

Oil pressing

PULSES

Chickpeas

One of the most heavily processed items in the pulse trade. Calibration is set by the destination market: Middle Eastern buyers favour larger calibres, while Europe prefers smaller, more uniform lots.

Origin	Türkiye
Type	Kabuli
Calibration	7 – 12 mm
Packing	25 / 50 kg sacks, big bag
Container	20' DC ≈ 25 tonnes
HS code	0713.20

APPLICATIONS

Hummus and paste production

Canned food

Catering and retail

NATURAL FOOD RESIN

Gum Arabic

A natural resin tapped from acacia trees, used in food manufacturing as an emulsifier, stabiliser and coating agent. Sudanese hashab and talha grades are treated as the international reference quality.

Origin	Sudan
Type	Hashab (Acacia senegal), Talha (Acacia seyal)
Form	Natural lump, kibbled, powder
Packing	25 / 50 kg sacks
Container	20' DC ≈ 18 tonnes
HS code	1301.20

APPLICATIONS

Beverage and confectionery industry

Emulsifier and stabiliser

Pharmaceutical and cosmetic

IN-SHELL AND HULLED

Pumpkin Seeds

Shipped in two forms, in-shell and hulled. Hulled pumpkin seeds come from varieties that grow without a hard shell, and are a mainstay input for the snack and bakery sectors.

Origin	Türkiye
Type	In-shell, hulled (GWS / Shine Skin)
Calibration	10 – 14 mm (in-shell)
Packing	25 kg sacks, vacuum carton
Container	20' DC ≈ 18 tonnes
HS code	1207.99

APPLICATIONS

Snack manufacturing

Bakery and baked goods

Health food blends

OILSEED

Peanuts

Shipped in-shell or as kernels, raw or roasted. Aflatoxin control is the decisive factor on this product; every lot is analysed before loading and the result shared with the buyer.

Origin	Sudan, Türkiye
Type	In-shell, kernels (blanched / natural)
Calibration	38/42, 40/50, 50/60 (count per ounce)
Packing	25 / 50 kg sacks, big bag
Container	20' DC ≈ 20 tonnes
HS code	1202.41 / 1202.42

APPLICATIONS

Snacks and nuts

Peanut butter production

Confectionery industry

SUDAN ORIGIN

Pigeon Peas

Known in Sudan as adasiya, pigeon peas are a staple pulse across the Indian subcontinent and East African markets. Shipped whole or split as toor dal.

Origin	Sudan
Type	Whole, split (toor dal)
Packing	25 / 50 kg sacks, big bag
Container	20' DC ≈ 25 tonnes
HS code	0713.60

APPLICATIONS

Pulse processing plants

Catering

Retail packing

DRIED FLOWER

Dried Hibiscus

The dried calyces of Hibiscus sabdariffa. Sudanese deep-red grades are the quality sought by the herbal tea and beverage industries for their colour intensity and acidity balance.

Origin	Sudan
Type	Whole calyx, broken
Colour	Deep red / burgundy
Packing	20 / 25 kg sacks, bales
Container	20' DC ≈ 8 tonnes
HS code	1211.90

APPLICATIONS

Herbal tea production

Beverage and syrup industry

Natural colourant

Decided before the container closes.

Quality is not a certificate attached at the end of a shipment; it is a sequence of checks that starts at the field and ends when the container doors are sealed. Every stage below is carried out on every lot we ship.

A shipment's success is decided before the container closes.

01

At source

The harvest is seen at the field and at the facility. We contract against a sample, not a description.

02

On processing

Cleaning, calibration and colour sorting are carried out to the contracted specification and checked on output.

03

Before loading

Every lot is analysed prior to loading. Results are shared with the buyer before the container is sealed.

04

At loading

Container loading is supervised, and loading photographs are sent to the buyer as a record.

Buyers may appoint an independent surveyor for pre-shipment inspection at their own cost. Analysis reports accompany the shipping documents.

Packed to the buyer's specification.

Packing is set in the contract, not assumed. The table below gives the standard formats and indicative container loads per product; other formats are available on request.

PRODUCT	PACKING	CONTAINER LOAD
Sunflower Oil	Bulk (flexitank), 1–5 L PET, 18 L tin	20' flexitank ≈ 22,000 L
Lentils	25 / 50 kg sacks, big bag	20' DC ≈ 25 tonnes
Sesame Seeds	25 / 50 kg sacks, big bag	20' DC ≈ 25 tonnes
Chickpeas	25 / 50 kg sacks, big bag	20' DC ≈ 25 tonnes
Gum Arabic	25 / 50 kg sacks	20' DC ≈ 18 tonnes
Pumpkin Seeds	25 kg sacks, vacuum carton	20' DC ≈ 18 tonnes
Peanuts	25 / 50 kg sacks, big bag	20' DC ≈ 20 tonnes
Pigeon Peas	25 / 50 kg sacks, big bag	20' DC ≈ 25 tonnes
Dried Hibiscus	20 / 25 kg sacks, bales	20' DC ≈ 8 tonnes

FORMATS
Woven sack 25 / 50 kg, polypropylene, printed or plain
Big bag 1,000 kg FIBC with liner, for bulk pulses and seeds
Flexitank 20' container, approx. 22,000 L, for edible oils
Vacuum carton For hulled seeds where oxidation is a concern
Retail pack 1–5 L PET and 18 L tin for oils; buyer-branded on request

Container loads are indicative and vary with packing format and product density.

Terms, loading and documents.

Altunpa trades on standard Incoterms and issues the full export document set with every shipment.

01

Delivery terms

- EXW — Ex Works
- FOB — Free On Board
- CFR — Cost and Freight
- CIF — Cost, Insurance and Freight

02

Loading options

- 20' DC container
- 40' HC container
- Big bag (1000 kg)
- 25 / 50 kg sacks

03

Documents

- Certificate of origin
- Phytosanitary certificate
- Bill of lading (B/L)
- Packing list and invoice
- Analysis report

OWN BRAND

Beyond raw commodity: Seyora.

Altunpa does not only move raw commodity. Under our own brand, Seyora, we produce and pack finished food and beverage lines in Türkiye — canned fish, edible oil, tomato paste, pulses and soft drinks — for retail and food service across our export markets.

PRODUCT LINES

01

Canned fish

Sardines and tuna packed in oil, in easy-open tins.

02

Edible oil

Bottled sunflower oil, in 1 L and 4 L PET.

03

Tomato paste

Stand-up pouch, plus 400 g and 2.2 kg catering formats.

04

Beverages

Energy drink, in slim cans.

05

Pulses

Red split lentils, in 20 kg export sacks.

Manufactured in Türkiye. Case configuration, shelf life and carton specifications available on request.

THE RANGE

Nine references, six product lines.

Labelling available in English and Arabic. Other languages on request.

From enquiry to delivery.

Every step from sourcing to customs is run by our own team. Below is how an order actually moves through us, stage by stage.

01

Enquiry and quotation

We take the commodity, tonnage, calibration, packing and destination port. Pricing is prepared against the delivery term and sent with a validity period.

02

Sampling and approval

Samples are sent on request. Once the buyer approves, the specification is written up and becomes an annex to the contract.

03

Contract and payment

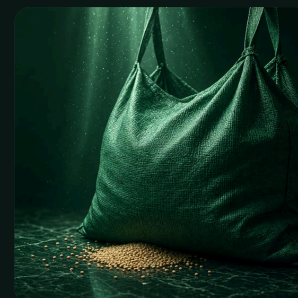

The sales contract is signed. Letter of credit, advance payment or cash against documents terms are settled at this stage.

04

Sourcing and quality control

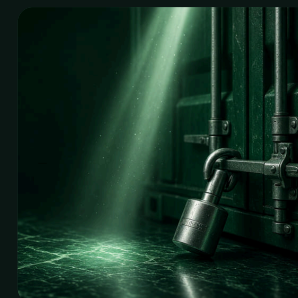

Goods are drawn from the contracted producer; after cleaning and calibration, analysis is carried out before loading.

05

Packing and loading control

The goods are prepared in the specified packing. Container loading is supervised, and loading photographs are shared.

06

Shipment and documents

Customs formalities are completed. The bill of lading and export documents are released to the buyer in line with the payment terms.

CONTACT

Request a quote.

Send us the product, quantity, calibration, packing and destination port. We will return a priced offer with a validity period, and a sample on request.
